

Device Farms

Create a page about device farms:

1. Embed the table from the following link

<https://steelkiwi.com/blog/steelkiwi-own-device-farm-to-test-android-apps/>

2. Record a video of you using [Samsung Remote Test Lab](#) - free
3. Record a video of you using [AWS Device Farm](#) - 1000 free minutes, \$.17/minute after that but requires a credit card on file. **Be careful selecting an account type.**
4. Upload both videos to YouTube (as unlisted or public) and share on your website

AWS Tutorial: <https://www.youtube.com/watch?v=ZWAUAerFB6s>

and list of available devices

<http://awsdevicefarm.info/>

To practice with iOS devices on AWS or other device farms, download to you computer and upload to AWS TestmunkDemo.ipa file from this folder

<https://drive.google.com/open?id=11jadRZObvomSm3S9Rxjmo6JSpqRZ8teF>

Once installed, the app will ask you to enter username and password. The username can be anything you choose, the password is testmunk. (This project was taken from this repository <https://github.com/testmunk/TMSample>)

To practice with Android devices on AWS or other device farms, download to you computer and upload to AWS app-debug.apk file from this folder

https://drive.google.com/open?id=1gpmTSqIXd4jzZDEZEL_DJKiVCW7kZeRv
